***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 17-35 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Independent claim 17, the only independent claim in the application, is drawn to a method of applying a liquid lubricant composition to a conveyor belt surface wherein the lubricant composition comprises (a) up to 95% by weight of an aqueous phase, and (b) a lubricating oil, wherein the liquid produces a dry lubricant film. The term "up to 95%" includes 0% so the claim is broadly drawn to applying any and all lubricating oils to a conveyor belt surface which produces a dry lubricant film. The examiner is of the position that the specification is not enabled for applying a composition "comprising" all known lubricating oils to a conveyor belt surface that produce a dry lubricant film. The specification sets forth on page 2 that the invention is the discovery that certain specific liquid formulations are suitable for producing a dry lubricant film on a conveyor belt surface. As set forth in the previous office action, it has been well established that there must be a reasonable correlation between the scope of the exclusive right granted to a patent applicant and the scope of enablement set forth in the patent application. *In re Fischer*, 427 F.2d 833, 839; 166 USPQ 18, 24 (CCPA 1970).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-20 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Douty et al (4,149,624).

As previously set forth, Douty et al ["Douty"] disclose a method of applying a water based silicone emulsion spray onto a conveyor belt surface. The silicone fluid may be dimethyl polysiloxane and the emulsion is manufactured having a 35% silicone fluid content. See col.7, lines 35-48. Douty teaches that a thin film results from the application to the conveyor surface. See col. 10, lines 25-28. The examiner is of the position that the method of Douty meets the limitations of independent claim 17. Applicant argues that the invention is concerned with a method of smoothly conveying objects, preferably containers filled with liquid, such as open beverage bottles or cans, which differs from the art area described in Douty. This is not deemed to be persuasive because the method of lubricating a conveyor belt surface sufficient to provide gliding contact with conveyed objects may be the same. The liquid composition of the claims is applied "discontinuously" to the conveyor belt surface which differs from the continuous application of the composition of Douty. However, this is not seen to distinguish the independent claim over Douty because one of ordinary skill in the conveyor lubricant art can readily determine the amount of lubricant need to provide the desired level of lubrication.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

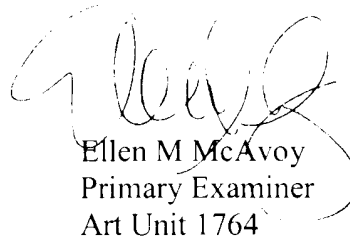

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
